OFFICE LOCATIONS

Triad Communications is headquartered in Baton Rouge, LA, however, our services are provided **nationwide**. Because of this, we have been able to establish strong partnerships with manufacturers, suppliers and vendors across the country.

This enables us to secure the best prices possible and pass those savings on to you.

You will not find a more service and quality-oriented partner!

Contact our office today:

(225) 928-1231 or (800) 676-2137

STRENGTHS

Experience

Long-term, committed employees are our greatest strength, period.

With 47+ years of performing projects across the United States in both union and merit shop markets, we have learned that the key to our success is our long-term, committed employees.

Safety

Safety is not just a "priority", it is a part of our culture.

The Core Values and Beliefs that Newton Thomas established create a culture where people are treated as family and not just as employees. This family culture makes safety personal for us and drives our commitment to safety excellence.

Quality

Quality is our passion.

"Excellence is expected from everyone" is a direct quote from the Core Values and Beliefs established by Newton Thomas. This endless pursuit of excellence in quality ensures that our customers receive the highest quality products and services in every aspect of our scope.

CORE VALUES

"We believe that all employees are to be treated as individuals and are to be shown respect and dignity. This is applied to both how the company and its management team treat individuals, and how employees treat one another. Our customers and vendors should also be treated with respect and dignity.

We believe that responsibility, authority and decision making should reside with the employee closest to the actual work being performed or the issue at hand. However, with responsibility and authority comes an obligation on the part of employees to perform in a self-motivated manner, to seek help when appropriate and to strive to make NGI successful. Excellence is expected of everyone.

As part of the partnership that the company has with its employees and management, the company is committed to sharing a substantial portion of its annual profits with employees and management in the form of annual bonuses. Although these are our values, we cannot lose sight of the fact that NGI is in business to make money. Without adequate profits, the company is not viable and cannot survive in the marketplace. Our core values are meant to serve as a constraint on the manner in which we conduct business and earn a profit, but are not meant to be the primary reason we exist.

As a result of these values, employees should have an enjoyable environment in which to work and should find that when they do what they think is right, it will be consistent with the values of the company."
